

Kevin Hall

America's Magic Maniac!

"You're going to Vegas!"
Howie Mandel - America's Got Talent

*I thought your performance
was really great! I loved how
energetic it was ...
That was a Hell of a trick!*
Penn & Teller - Fool Us

Kevin Hall is not just another super computer designer turned entertainer. Oh sure, he has the great comedy, mysterious magic and entertaining speaking skills you'd expect. However it's when he launches into fire twirling, acrobatic dancing and singing (sometimes all in the same show!) that you start to realize just how talented he really is!

A CBS news anchor called him a true "Magic Maniac" and the name stuck! He is known for his outrageous hi-jinks on stage and his uncanny ability to get the audience involved. When he works with children, he super charges their self-esteem by making them the stars of the show. Kevin himself explains it this way.

"I am all about high-energy interactive fun. I give my audiences the thrill of wild comedy, eye-opening magic, singing, dancing, storytelling and more!"
"Some spectators become heroes, others face incredible challenges and a few may even find themselves dancing on stage in full costume! With Kevin, anything's possible and everyone's part of the fun."

In his larger shows Kevin teams up with Janet Hall an accomplished quick change artist and illusionist. Their "Halls of Magic" show is simply spectacular. The bottom line?

Total entertainment that has dazzled audiences everywhere!

"I laughed so hard my sides hurt!"
- 3M Corporation

A bit about Kevin Hall:

Growing up, Kevin didn't realize how unique his family was. He thought every family had 15 kids. He thought everyone's Mom had her own Musical Zanygram business. He thought all families were involved in show business too. However, while his many siblings focused on talent contests, auditions and cutting albums, He earned a degree in engineering.

*"Kevin turned our boring banquet
into an all out party"*
- Best Buy

As an award winning Super Computer designer, he found he enjoyed presenting technical data to Fortune 500 companies across the US and Canada. Then he started taking acting, dancing and improv lessons. As Kevin says "I was getting a patent in integrated circuit design during the day, and dancing with flaming machetes at night!" While he was highly respected and successful in the tech industry, Kevin learned something that changed his life, "You Can't Fight Showbiz!"

So Halls of Entertainment Inc. was born and now they engage and delight audiences the world over.

*"Janet changed her costume in
less than 1 second. Unbelievable!"*
- Grand Lido Resorts
